Diabetes

Remedy'sRx is your local source for all of your Diabetes care needs. We can help with your routine Diabetes management, as well as prepare you for travel and emergencies.

- Ask your pharmacist for cough and cold medication recommendations that will not raise your blood sugar levels.
- Diarrhea and vomiting will offset the amount of medication you need. Your pharmacist can recommend adjustments to your medication doses and diet during your recovery.
- If your travels take you across time zones, speak to your pharmacist for a plan to shift your medication timing to keep your energy levels up so you can enjoy your trip to the fullest!

If you would like to know more about Diabetes medications or would like a comprehensive medication check-up, speak with your Remedy'sRx Pharmacist.
